## Western Dovetail Scoop Gallery

Western Dovetail offers many different designs for scooped front drawers. There are four basic design categories and several more variations. The four basic designs are:

### Scoop – A-00: Ogee Scoop

Ogee Scoop has an ogee slope with a rounded top corner and rounded bottom corner with a flat bottom. There are several variations available both deeper and shallower.

### Scoop – B-00: Crescent Scoop

Crescent scoop is a simple arc that cuts through the top edge. There are also many variations of the crescent wider, narrower and deeper and shallower with different radii.

### Scoop – C-00: Shallow U-Scoop

The Shallow U-Scoop is the basic shape of a flat bottom scoop with square top corners and a 1/2" radius at the bottom corners. Standard depth is 1", but various depths are available.

### Scoop – D-00: Deep U-Scoop

The Deep U-Scoop is basically the same as the shallow U-Scoop but the radius in the corners is 1". The Standard Deep U-Scoop is 1 1/2" deep.

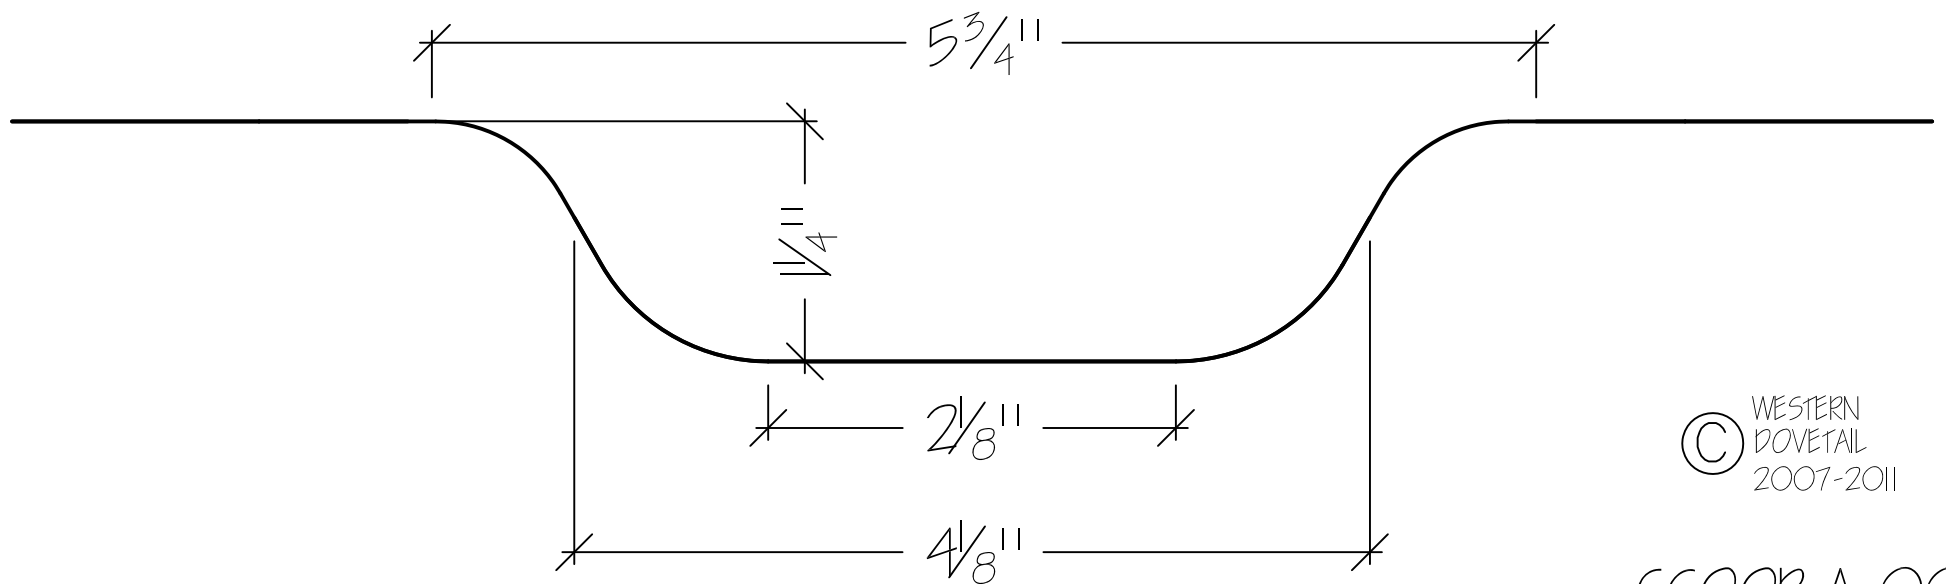

The following pages include a directory of scoops and full size drawings of each scoop. The common scoops above are labeled with the letter followed by two zeros (-00). The variations on each scoop are labeled with -01, -02 etc... Further, there are more variations labeled -11, 12, etc... the numbers that start with a "1" are rounded at the top edge for a different style with no sharp edges. Find the style of scoop you are looking for in the directory and then reference the scoop number and go the page with the full size scoop to get a printable drawing of your scoop. All scoops in this catalog are considered standard and there is no set-up fee for using any scoop in the gallery. If you have a new design that you would like us to make, we can make a custom template for a small fee.
